Kartelllights.

#### KARTELL LIGHTSTYLE

In 1958, Kartell decorative lighting design brought together some of the greatest names on the international design scene, including Achille and Pier Giacomo Castiglioni and Marco Zanuso. It is a truly extraordinary inheritance of which Ferruccio Laviani bravely took up the reins in 2002, the year in which the lighting division was given a new boost and a path embarked on that was marked by innovation, research and a continuous drive to creatively respond to the major technological challenges of our times. Today, Kartell's lighting is versatile and the large collection of lights for decorative or technical use that furnish the indoor and outdoor domestic or working spaces ensures perfect adaptation to suit any ambiance.

Twenty years of light: the light FL/Y "bubble" represented the fresh start, a turning point in the brand's history that would subsequently give rise to an ironic, contemporary, extremely versatile lighting collection. It is a coherent project that respects the values of industrial production and quality of materials. A constant evolution, hinged on a few key points that have defined the "Kartell lightstyle", like the iconic Bourgie and Take and the new classics Battery and Mini Planet.

Lights that excite, creating unique atmospheres and defining the very nature of ambiances. Lights that illuminate but also do so much more, overcoming new technological frontiers, like the complex game of transparencies played by Kabuki or the reflections created by Planet.

New solutions and new designs for different occasions. Kartell lighting has grown, also responding to the needs in the office and contract segments, for example with the first of the collection's lamps to be dedicated to technical lighting, Aledin.

The growth of Kartell Lighting is enjoyed in step with that of the company as it explores new technological milestones, continuously overcoming limits and employing new materials, in particular with the ambitious aim of converting the catalogue with the new green solutions wherever possible.

3

### **HOW TO READ THE DATA SHEETS**

#### **GENERAL INFORMATION**

A leading design brand, Kartell has for over 70 years been a creative laboratory of ideas and design working according to a logic of innovation and industrial production. In parallel, the brand pursues creativity with impossible challenges that have never been overcome before, proposing a unique and unprecedented offering that guarantees quality and maximum styling appeal for customers on a broad range of products made with trailblazing production technologies and novel, innovative materials. Continuous attention to quality also includes a focus on environmental sustainability both during production and in the management of the product itself. This publication contains technical information and advice for use that we hope our customers will find helpful.

N.B. The company reserves the right to make changes to the technical characteristics of the products in the catalogue, without notice. Any new product or variation to the technical characteristics of the products will be made known to the public via the most effective methods. How to read and use the Price List

The pages are organised vertically for each family of products, simply scroll down to read the technical information for each one. Specifically, you will find the following information for each product:

#### (A) PRICES

The prices shown in the following price list apply from 1st February 2022 and are valid for 12 months, subject to Kartell's right to revise the same following prior notification. All prices are shown in the reference country currency. For each individual item, the price including VAT will be shown, with the price excluding VAT indicated below. VAT is calculated in compliance with the law in force when the price list is printed. Prices are always per unit. Exceptions to this rule are countries in which dual pricing has not been specifically set out, and therefore only the net price is indicated.

#### (B) CODE

This is the number which accompanies each product or individual component, and must be indicated on every order. It is located next to the technical drawing or finish.

#### (C) DIMENSIONS

The maximum dimensions are indicated in order to provide all of the necessary elements to assess the space occupied by the product. Depending on the country of reference, the units of measurement are cm or inches.

#### (D) WEIGHT

The net weight of the product is stated, as this is a useful piece of information for products such as tables and chairs, to evaluate the suitability of the product for a specific use (e.g. for use in public spaces). Depending on the country of reference, the units of measurement are kg or pounds.

#### (E) DESCRIPTION AND MATERIALS

This section contains details of the materials and any essential technical and functional aspects.

#### (F) COLOUR SAMPLES

Details of the colours or colour combinations available. The full-colour guide symbol identifies the colours available to be freely combined, the two-way guide symbol identifies the fixed seat/colour pairing that cannot be changed. The colours shown are as close as possible to the actual product shade. However they are to be considered as general indications for consultation.

#### **G** SYMBOLS

INDICATES THAT THE CHAIR IN QUESTION IS STACKABLE AND SPECIFIES THE MAXIMUM

INDICATES THAT THE PRODUCT IS JITABLE FOR OUTDOOR USE

INDICATES THAT THE PRODUCT IS

PRODUCT MADE OF BIOPOLYMER CREATED USING RAW MATERIALS FROM RENEWABLE SOURCES OF NON-GMO AGRICULTURAL ORIGIN

#### SYMBOLS AND SPECIFICATIONS ASSOCIATED WITH INDIVIDUAL LIGHTS

#### INSULATION CLASSES

CL 1 INDICATES THE LEVEL OF PROTECTION AGAINST ELECTRIC SHOCK, IN THE CASE OF CLASS 1, INSULATION IS "SIMPLE" AND THE APPLIANCE'S EARTHING DEVICES ARE REQUIRED.

PROTECTION RATING

Indicates the degree of protection against the Penetration of dust, sould bodies and moisture. IP20 ratins, refers to ordinary appliances that have NO Specific Reguirements.

## **USE AND MAINTENANCE**

product charts

Simple care is needed for the maintenance of Kartell products to retain the original features of the materials.

During the cleaning phases, all Kartell items must not be in charge and / or must be disconnected from the mains supply.

### PLASTIC MATERIALS

**Cleaning.** Use a soft damp cloth with soap or a liquid detergent, preferably diluted with water.

The use of the following substances must absolutely be avoided: acetone, trichloroethylene, ethyl alcohol or detergents containing even small quantities of these substances which cause irreparable damage to the plastic of which the products are made. We recommend always using a damp cloth to prevent plastic surfaces from becoming charged with static electricity which attracts dust. Also avoid abrasive solvents, cleaning powders and creams, steel wool or rough spange cloths.

**Use.** Do not drag objects across the plastic surface, even if it has a scratch resistant finish, since sharp objects can damage the plastic just as they would damage wood or metal. Do not place very hot plates or pots directly on the surface, but always use a cloth or trivet.

## CHARACTERISTICS OF LIGHTING PRODUCTS

The battery-operated lamps are fitted with a rechargeable lithium battery: the lithium polymer battery combined with the design of the circuit board ensures faster charging.

It is important for the lamp to be powered with a SELV power source or equivalent for charging

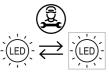

The rechargeable battery pack can be replaced, but only with a GENUINE spare part: the use of ordinary batteries could become dangerous as they are not compatible with the device.

To replace the battery, contact your nearest Kartell store.

In lamps containing a built-in LED module, the light source can also be replaced: in this case, the replace-ment of the LED part must only be carried out by qualified staff, always and only using aenuine spare parts.

To replace the LED module, contact your nearest Kartell store.

These products have one or both of these symbols::

In lamps fitted with a light bulb, the light source can be replaced with a similar source, respecting the data indicated on the label. We recommend using a light source with a colour temperature of 2700 K.

These products have this symbol:

## LIGHTING REGULATIONS CERTIFICATIONS

### REFERENCE MARKS

**CE** – indicates the conformity of the products bearing the acronym with the essential requisites of European Community directives.

**ENEC** – the European trademark for high quality in electrical products which indicates conformity with current European regulations is recognised as the equivalent of the individual national trademarks in 20 European countries, signatories to the Lum Agreement.

**ETL** – American and Canadian trademark of quality for electrical products. It certifies product conformity with current American and Canadian regulations.

**PŠE** – Japanese trademark of quality for electrical products. It certifies product conformity with current Japanese regulations.

NOM - Mexican trademark of quality for electrical products. It certifies product conformity with current Mexican regulations.

**EK/KC** - Korean trademark of quality for electrical products. It certifies product conformity with current Korean regulations..

## CB Certificate (Australia and New Zealand)

Certification attesting product conformity with international IEC regulations, can be issued with specific national deviations.

**CB Certificate** – Certification attesting product conformity with international IEC regulations.

**CCC** - China Compulsory Certificate The brand certifies product compliance with Chinese standards and is mandatory for lighting products imported in China.

### **ECO-CONTRIBUTION**

Introduced in Legislative Decree no. 151 dated 25 July 2005 (updating directives 2002/95/EC, 2002/96/EC and 2003/108/EC), the eco-contribution is an environmental charge used to pay for waste management of electrical and electronic equipment (WEEE). This charge is used to finance all phases of treatment, transport, recovery and disposal of electrical and electronic appliances. Kartell lighting prices include the WEEE.

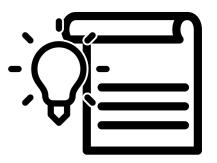

## NOTICE PURSUANT TO ARTICLE 13 OF LEGISLATIVE DECREE NO. 151 DATED 25 JULY 2005.

Directive 2012/19/UE (waste electrical and electronic equipment: WEEE):

User information: pursuant to article 13 of Legislative Decree no. 151 dated 25 July 2005, no. 151 "Updating of Directives 2002/95/EC, 2002/96/EC and 2003/108/EC, regarding the reduction in the use of dangerous substances in electrical and electronic equipment, and the disposal of waste" this product is conform.

The barred bin symbol on the equipment or their packaging indicates that at the end of its useful life, the product must be disposed of separately from other waste. The user must take the equipment to an authorised recycling centre for electronic and electric waste, or return it to the original vendor when purchasing an equivalent product, on a one-to-one basis. The appropriate collection for environmentally-compatible recycling, treatment and disposal contributes to avoiding possible negative effects on the environment and its health and encourages the reuse and/or recycling of the materials used in the equipment. Improper disposal of the product by the user will result in the application of the administrative sanctions stipulated by regulations in force.

### **ECODESIGN FOR LIGHTING**

In response to current legislation, Kartell is working hard to bring its lighting products as closely as possible into line with the parameters established by the ECODESIGN directive.

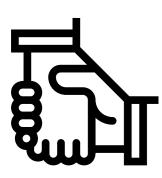

The EU Ecodesign Directive establishes a framework under which manufacturers of energy-using products are obliged to reduce the energy consumption and other negative environmental impacts occurring throughout the product life cycle (production, use and disposal).

In particular, the regulation requires that light sources and their power supplies permit access for technical checking and that they be "disassemblable" to permit repair in the event of failure. Light sources must also be "replaceable" to permit upgrading or the installation of more efficient or improved components as these become available in future.

122 123

## **GENERAL TERMS AND CONDITIONS OF SALE**

### I. SCOPE

 These General Terms and Conditions govern sales contracts entered into by Kartell S.p.A. ("Kartell") and its clients, professionals that purchase and resell ("Client") the Goods presented in the Kartell catalogue ("Goods").
 The General Terms and Conditions of Sale may be waived or modified only through a written agreement between Kartell and the Client.

### II. ORDERS

- Each Product order constitutes an irrevocable offer by the Client. Kartell reserves the right at its sole discretion, to accept, modify or refuse orders at its sole discretion, or to suspend delivery should the Client not provide Kartell with guarantees for the request and not respect the sales guidelines issued by Kartell from time to time.
- Excluding purchases made for specific purposes agreed in advance with Kartell or in the "contract" channel, the Goods may only be resold retail at the sales point indicated to Kartell.

### III. PRICE

- Unless otherwise agreed, the prices of the Goods indicated in the price list are ex works for deliveries within the European Union, and ex Kartell warehouse for deliveries outside the European Union.
- 2. The minimum amount of each order for delivery inside Italy is €400.00 (four hundred euros) excluding VAT, and €500.00 (five hundred euros) excluding VAT within the European Union. Should the order not reach this amount, the order may be accepted with a minimum additional charge on the Client invoice of €25.00 (twenty-five euros) in the first case, and €40.00 (forty euros) in the second case as a "partial contribution to expenses".
- The price applied to the Goods is that in force at the order date. VAT must be added to the prices indicated in the price list (minus any discounts) in accordance with the law.
- 4. Kartell reserves the right to modify the price of the Products indicated in the price list, at any time, as a result of events that determine an increase in production costs, by way of non-limiting example, an increase in the costs of (i) raw materials, (ii) transport, (ii) labour, (ii) energy, etc., or any other factor relating to production dynamics. It is understood that any changes in the price of the Products shall not in any way affect orders finalised before the entry into force of such price changes.

### IV. OWNERSHIE

 Pursuant to Articles 1523-1526 of the Italian Civil Code, ownership of the Goods will be transferred to the Client only upon full payment of the price. In the event of hire purchase and Client default, Kartell shall retain any instalments already paid by way of compensation, without prejudice to claims for greater damages.

### V. PAYMENTS

- Payment is considered to have been made only when Kartell is in possession of the amount. In the event of payment by cheque or other method, the payment method must be considered to be accepted subject to payment in due course.
- However, order payment may not be suspended or delayed due to Client claims or defences regardless of ownership, nor may the Client offset debits and credits with Kartell.
- 3. In accordance with Article 1186 of the Italian Civil Code, failure to pay or partial payment of any amount owed to Kartell shall automatically place the Client in default with the resulting expiry of the time limit and Kartell's simultaneous right to suspend deliveries, refuse or cancel orders, modify sales conditions and take action to ensure full payment of the credit, in addition to expenses, interests and damages. Late payment will also result in the automatic application (with no prior notice) of late interest at the rate established by Article 5 of Legislative Decree 231/2002.

### VI. DELIVERY

- The delivery date is purely approximate and non-binding, with Kartell being entitled to make partial deliveries.
- Should delivery be delayed as requested by the Client, Kartell reserves the right to charge monthly warehousing and/or handling expenses equal to 10% (ten percent) of the amount indicated on the invoice, beginning in the month following notice to the Client of the Goods' availability.
- Any Product order cancellation or rejection at receipt will result in the application of a penalty on the Client of 30% (thirty percent) of the amount indicated on the invoice, without prejudice to claims for greater damages.
- 4. Should the Goods be shipped outside EU territory, the Client must provide Kartell all documents certifying Product delivery within one (1) month. Should the Client fail to do so, Kartell reserves the right to charge the Client all expenses incurred to complete the sale operation.
- 5. At delivery, the Client must carefully inspect the quantity and condition of Product packaging. On pain of forfeiture, any obvious defect must be: (i) reported in writing to the shipper at the time of delivery, indicating expressly on the consignment note "conditional acceptance", and (ii) promptly reported in writing to Kartell within 48 (forty-eight) hours of delivery, in compliance with the instructions below.
- Any returns must be approved in writing in advance by Kartell: unauthorised returns will be returned to the sender along with delivery charges.

### VII. GUARANTEE AND CLAIMS

- The legal guarantee for the Goods begins, as per Article 1495 of the Italian Civil Code, on the date of acceptance of Product delivery by the Client or its representatives.
- Any claim regarding the Goods (excluding those identified at the time of receipt and regarding shipping) must be made in writing to Kartell within 8 (eight) days

- of the discovery, and in any case within 12 (twelve) months of Product delivery acceptance by the Client or its representatives in compliance with the following procedure: (Par. 6. Claims)
- 3. With reference to the Consumer Code, Legislative Decree 206 of 6 September 2005, Articles 131 and 132, the Client loses and forfeits any right of recourse against Kartell if it does not notify Kartell in writing of an end-customer claim within 8 (eight) days of receipt of the end customer's complaint using the procedure described above.
- 4. Kariell shall not be liable for damages caused by improper use, tampering, normal wear or failure to respect the assembly and maintenance instructions included in the product card, or component modifications or replacements with others not in accordance with the original specifications.
- 5. In any case, Kartell's liability is limited to the value of the defective goods: Therefore, Kartell may not be held liable, among other things, for expenses sustained by the Client or end customer or for any other damage claimed (direct or indirect).
- 6. The bulbs contained in the packaging of each lamp are supplied by Kartell as a courtesy in order to provide the best service to our customers. However, since these accessories are not directly manufactured by Kartell but supplied by external suppliers, Kartell does not guarantee their correct function. In case of bulb fault or failure, it is the customer's responsibility to replace the bulb, in compliance with the technical information in the catalogue, in the dedicated section, or in the instruction booklet enclosed with the product, to which reference is made in full, and for which Kartell assumes no liability.

### VIII. COMPETENT COURT

- Any disputes arising directly or indirectly from the contractual relationship are the exclusive competence of the Milan court.
- Applicable law is substantially Italian (excluding any application of foreign laws).

### **CLAIMS FOR SHIPPING DAMAGE**

Should one of the following situations be noted at the time of Product delivery

- a) merchandise missing with respect to accompanying document
- b) merchandise different with respect to accompanying document
- c) Damaged packaging, highlighted by the relevant impact indicator where it is affixed to the packaging;

### the Client must

- write reservations on the consignment note (either on the carrier's copy or on the recipient's copy). Written reservations must be detailed, as general reservations are not sufficient to allow proper processing of the claim
- 2. Complete the reporting form ( Transport claim form ) in full: the form (facsimile shown below) is available from Kartell's regional agent, or Kartell's Sales Office at transport@kartell.it;
- Send a copy of the consignment note and the reporting form within 48 (forty-eight) hours of Product receipt.

## CLAIMS FOR PRODUCT NON-CONFORMITY

To notify Kartell of a claim in the event of Product non-compliance, send the following documents to the Kartell Customer Care Office at quality@kartell.it:

- The product non-compliance form ( Generic claim form ) completed in full. the form (facsimile shown below) is available from the Kartell Customer Care Office, at the e-mail address above, or from Kartell's regional agent:
- 2. Photographs showing the non-compliance (at least one photo per non-compliant Product)

If the complaint concerns a **new product** - just received by the customer or just delivered by the customer to the end customer - you must also send images of the relative packaging, supplying a full view and close up of the double label (production and shipping), as shown below:

You should keep hold of the Quality Control slip found inside the Product information, because it contains information which may be required by the Kartell Customer Care Department to make any required checks on production batches potentially affected by non-conformity. After sending the documentation indicated in the above paragraphs, we recommend you keep the original product packaging.

Only reports sent to the aforementioned addresses along with all the required elements will be taken into consideration by Kartell.

In the absence of any or all of the required documentation and/or the original packaging, or in

the case of failure to follow the procedure set out above, Kartell will be unable to follow up your report.

Kartell cannot be held liable for any damage, defects or faults caused to the products or resulting in any way from and/or connected with transport or deliveries not carried out directly by Kartell through its agents or carriers. Kartell strongly recommends the use of transport companies with proven experience, which guarantee a high level of service.

If it is possible to use the WebUP system, the complaint can be registered in the system using the same procedure.

# CERTIFICATIONS ISO 9001:2015

### **COMPANY QUALITY CERTIFICATION: ISO 9001**

In 1996, Kartell decided to certify its Corporate Quality Management System in compliance with UNI EN ISO 9001:1994 standards.

In 2005, the company aligned its Quality Management Systems with the standard UNI EN ISO 9001: 2000.

In 2008, the company renewed its ISO 9001:2000 certification. And, in 2010, it switched to UNI EN ISO 9001:2008.

During 2017 Kartell updated its certification standard to UNI EN 9001:2015.

A guarantor for this certification process is the I.I.P. (Italian Institute of Plastics), which is itself accredited by SINCERT and CISQ, the Italian federation of accreditation bodies for Quality Management Systems. CISQ is part of IQNET (International Certification Network), a supranational body which guarantees

mutual recognition of the ISO standard in countries worldwide.

The attainment and maintenance of this certification, made possible by the commitment and perseverance of all company offices involved, testifies to the continued research into ever higher levels of quality in company management systems.

A copy of the Quality Certification is available for downloading on www.kartell.com

# CERTIFICATIONS ISO 14001:2015

### ISO 14001 CERTIFICATION

In 2011 Kartell achieved UNI EN ISO 14001: 2004 certification for its support of an effective Environmental Management System, an international standard recognised throughout the world and developed about 10 years ago which defines development and implementation parameters in corporate processes in order to achieve an effective environmental management system.

## WHAT IS ISO 14001?

This certification attests that the organization certified has implemented a management system capable of controlling environmental impact in its own business and systematically endeavours to improve it in a sustainable, effective and consistent manner. ISO 14001 certification is not obligatory but is the result of the voluntary choice of the Company which decides to define, implement, maintain and improve its own environmental management system.

During 2017 Kartell updated its certification standard to UNI EN ISO 14001:2015. A copy of the Quality Certification is available for downloading on www.kartell.com

## SUSTAINABLE GROWTH AND DEVELOPMENT IN VIEW OF THE AGENDA FOR 2030

Kartell is continuing down the road begun by the "Kartell loves the planet" manifesto and drafting a company sustainability policy covering 11 of the 17 Sustainable Development Goals (SDGs) established by the United Nations as a "blueprint to achieve a better and more sustainable future for all".

Kartell has identified the SDGs most relevant to its business in order to bring about a convergence of interests and encourage the involvement of the entire production chain and distribution network. Our aim is to develop products that are designed by the world's top creatives, made from sustainable materials, and produced using the most innovative industrial techniques to reduce our impact on the environment. We are equally committed to offering customers products that are stylish and well made, and that accurately represent the age-old culture of beauty on which the value of Italian manufacturing is

We have already made the circular economy central to our environmental sustainability processes. At the same time, we believe it our duty to promote the circularity of beauty based on ethical and aesthetic sustainability. Italy's industrial system is generating a beauty-based economy as part of the country's immense cultural heritage, and Kartell is on the front line in this mission

Kartell products are timeless and conceived to merit a place in museums and private collections.

Our corporate strategy is based on ethical production, transparent financial management and the economics of beauty.

Recycled materials contribute to the circular economy and ensure recyclability in other industrial processes.

We invest in continuous research into new materials and new production processes (e.g. bioplastics derived from vegetable waste not destined for the

Our industrial processes are waste and emissions free

We are ISO and Greenguard certified.

Our packaging is recyclable and sustainable.

We are engaged in social solidarity projects worldwide.

We provide a sustainable working environment.

We believe in training

<sup>\*</sup> In September 2015, the governments of the 193 member states of the General Assembly of the United Nations approved the UN's Sustainable Development Goals (SDGs). These 17 goals form a plan of action for peace and prosperity for people and the planet known as the 2030 Agenda for Sustainable Development.

## BEING THE FIRST IN INNOVATION, COMBINING DESIGN AND INDUSTRIAL TECHNOLOGY

### FEEDING THE BEAUTY OF THINGS AND RESPECT FOR PEOPLE.

A Kartell product is timeless, produced with the utmost respect for the environment and destined - on completion of its function - to occupy museum spaces and join collectors' assets. A beautiful and well made product, part of a production process that pursues perfection, pays attention to detail and studies every possible evolutionary change.

### DOING GOOD AND MAKING PEOPLE FEEL GOOD

Kartell objects are environmentally friendly and hold certifications that confirm their low level of emissions.

### CIRCULAR ECONOMY

New design for regenerative economy Kartell takes a better path in our commitment to environmental sustainability, using recycled materials where technology allows.

### RESPECT FOR THE ENVIRONMENT AND SUSTAINABILITY.

For seventy years, Kartell has played a leading role in innovative production and product creativity. Respect for the environment is, and always has been a value that goes to the heart of the brand and in a bid to strengthen this commitment the company launched the "Kartell loves the planet" mission, the industrial manifesto with which it focuses on environmental responsibility and attention to good sustainability practices.

In recent seasons, Kartell has supplemented its use of traditional materials with innovative projects that summarize research and innovation of materials and production processes.

### SOCIAL SOLIDARITY PROJECTS WORLDWIDE

Taking care of new generations

The "Kartell loves the planet" industrial mission statement extends our commitment to sustainability to social solidarity, including support for the education of young people in countries most in need of aid. For example, for its seventieth anniversary, Kartell has launched a solidarity project in favour of the Fondazione Francesca Rava - N.P.H. Italia and its international "Building Sustainability through Education. Empowering the young generation to be leaders of a green revolution" programme. The company is awarding study grants to Latin American university students to sponsor research in environmental sustainability projects.

## **INDEX** OF PRODUCTS

## RECYCLED MATERIAL

pure waste material that has been set aside and is not Kartell, which combines a second generation renewable contaminated by other materials. The choice is dictated polymer made from cellulose and paper waste with an by the possibility to use scrap material that guarantees SCC (International Sustainability and Carbon Certificathe aesthetic quality and structural requirements of the tion) certified process. product, reducing the emissions necessary for its production ISCC was one of the first schemes for the sustainability

With this material, Kartell intends to go one step further energy sector to be issued at European level, and it is in its commitment to environmental sustainability, using now one of the most popular and widely recognised. recycled material while eliminating waste from the environment and turning it back into raw material, activating resistant and flame retardant properties, elasticity, excela virtuous process of circular economy.

## **POLYCARBONATE 2.0**

A recycled thermoplastic technopolymer obtained from Polycarbonate 2.0 is a material, used exclusively by

of products throughout the supply chain in the renewable

lent mechanical properties and easy recycling, are retained in version 2.0.

## **RECYCLABILITY**

Recyclability, sustainability, eco-compatibility - in two The packaging contains mainly recycled material and is words environmental friendliness - are the issues at the heart of Kartell's product development strategy.

as early as the design and production phase: to simplimaterials. fy recycling, the various components of Kartell products are easy to disassemble and separate into single-materials parts; furthermore, all plastic components are clearly marked to ensure that they can be easily identified and
