MATERIAL

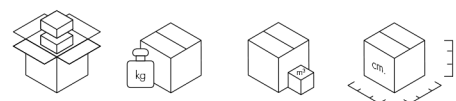

Hand-tufted and hand-cut Himalayan wool, vegetable and mineral dyes

PRODUCT MAINTENANCE To extend the life of your rug, clean it regularly. Do not shake or beat a tufted rug as this can damage it irreparably. Do not wash in water. Vacuum cleaning is the most effective method of cleaning. Performed regularly, it ensures removal of any dust and dirt deposited on the rug. N.B.: A few filaments of wool may become detached from the rug during vacuum cleaning. This is a normal occurrence as wool and/or silk rugs always contain loose fibres when new. These will gradually disappear over time. To remove loose fibres quickly, we suggest vacuum cleaning the rug daily for an initial period. The most effective way to eliminate dirt is to pass the vacuum cleaner over the rug one direction at a time. Do not bleach. Do not place in a dryer. Do not iron. Do not dry clean.

STAIN REMOVAL Remove stains immediately, taking care not to damage the fibres. Soak up liquid stains immediately using absorbent paper then dab the area with a cloth dampened in warm water. N.B.: Take care not to wet the rug as this can damage the fabric. To remove stubborn stains, use a detergent with a neutral pH that does not contain bleaching agents. Once the stain has been removed, remove all traces of the detergent to restore the natural characteristics of the fibres. Take particular care with detergents that are green in colour, as these can stain light coloured rugs. We recommend having your rug cleaned by a professional cleaning service at least every 12-18 months. Avoid the use of ethyl alcohol or detergents containing even small quantities of acetone, trichloroethylene and ammonia (solvents in general).

ROTATING THE RUG We recommend rotating the rug at regular intervals to ensure even exposure to light and wear. Doing so ensures a more uniform surface over time. Kartell declines all responsibility for damage to property or injury to persons resulting from improper use of the product. The warranty excludes all service and repair of the product or parts thereof damaged as a result of improper use.
