

# BELVEDERE TECH 2025

Design Ludovica Serafini + Roberto Palomba

5859

**FRAME**

Recycled thermoplastic technopolymer with mineral filler

**SEAT AND BACKREST**

Woven technopolymer

The Belvedere Tech chair upholstery uses a technical fabric. Its composite structure ensures exceptional durability, dimensional stability, and resistance to external agents, while maintaining shape, color, and performance over time. Designed to offer comfort, long-lasting use, and easy maintenance, the fabric ensures ideal outdoor performance, combining tactile quality with technical reliability in perfect harmony with the contemporary aesthetics of Belvedere Tech. The range features high-performance fabrics: high strength, the ability to withstand challenging climatic conditions (UV rays, mold, weathering), and excellent durability. These products do not contain intentionally added PFAS (they were neither formulated nor designed to contain PFAS affecting a specific function or characteristic of the product).
