- The round version of the Componibili with a 42 cm diameter is now presented in a renewed form, the result of a new industrial mold that enhances both its quality and aesthetic appeal.
- The color range has been expanded to include shades already available in the 32 cm version, as well as new tones that blend a contemporary spirit with historical references.
- The new version is available in 2- and 3-element configurations, with non-separable compartments—a technical evolution that further enhances this catalog classic.
