SEAT AND BACK

Polyurethane coated with genuine leather tanned in natural processes using olive oil waste

Full-grain leather

discover AVOTAN™

AVOTAN® A new, ecological, sustainable and circular tanning process. Italy is one of the world's largest producers of leather goods and the world's second largest producer of olive oil. Olive oil production generates oil vegetation water as a waste product. This waste product, however, contains substances that are highly valuable for the tanning industry: phenols and polyphenolic compounds with an effective antimicrobial and phytotoxic action, antioxidants and tanning agents. In this way, two food industry waste products can be used to create a valuable, long-lasting, ecologically sustainable and circular product. Unlike other vegetable tanning solutions, this Avotan uses no natural resources, does not contribute to deforestation, and uses existing waste that would otherwise have to be disposed of.
